

## Steel palisade specification and profiles

CEM Fencing Contractors steel palisade guide

Height	Pale Profile		Centres	Post spec	Post Height
m	D (mm)	W (mm)	m	mm	m
1.8	3	2	2.75	102 x 44	2.325
2.0	3	2	2.75	102 x 44	2.725
2.1	3	2	2.75	102 x 44	2.725
2.4	3	2	2.75	102 x 44	3.125
2.7	3	2	2.75	102 x 44	3.425
3.0	3	2	2.75	102 x 44	3.925
3.6	3	2	2.75	127 x 76	4.725

CEM Fencing Contractors can offer steel palisade pales in a choice of 'w' profile or 'd' profiles. The 'w' and 'd' refer to the pale profile shape and each profile provides different benefits. We are able to offer steel palisade with different profile and post specifications to above.

CEM Fencing Contractors most commonly use W section pales due to their rigidity.

### W' Section

'W' section palisade provides a higher rigidity with a thinner profile thickness; this is due to its shape. Extra security is also provided as the fixings are concealed.

### 'D' Section

'D' section palisade is available upon request.
